Office Action Summary

Art Unit: 3739

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17-22 are indefinite because this is no physical connection, or interaction recited or even disclosed between the claimed elements. As such the description of this collection of articles as a "system" is inaccurate. It appears the collection of elements intended to be used to perform a process is more accurately a kit. Claims 18 and 20 are further indefinite because there is no further structure recited by the description of the intended use of the lasers.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 17-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sklar et al in combination with Davenport et al. Sklar et al teach a laser device as claimed. Davenport et al teach an ocular implant as claimed. It would have been obvious to the artisan of ordinary skill to possess those devices, since the corneal implant could be used on patients which require an optical correction so great that it cannot be provided by laser surgery and the laser system used on the other patients, thus producing a system such as claimed.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225

Art Unit: 3739

USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-16 and 23-25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 6,217,571 in view of Bille et al. Bille et al teach the use of an ultrashort pulse laser to create a stromal pocket. It would have been obvious to the artisan of ordinary skill to create the stromal pocket with the laser of Bille et al since ^{this} leaves a ^{smoother} smoother surface (see column 10, lines 20-29) as taught by Bille et al, thus producing a method such as claimed.
